

# MultiSearch

Implementing AARLIN at  
Monash University Library

# Organizational Framework

- **MUL AARLIN Project Officer**
- **MUL Digital Resources Librarian**
- **MUL Portal Reference Group**
- **AARLIN Office**
- **Other AARLIN libraries**
- **Listservs**
- **AARLIN Steering Committee**

# AARLIN Technologies

- **Vendor: Ex Libris**
- **Federated search engine: Metalib**
- **Open URL Link Resolver: SFX**

# AARLIN OFFICE Support

- **AARLIN Manager**
- **AARLIN Support Officer**
- **Two AARLIN Systems Officers**

# MultiSearch Implementation Milestones

- **Naming the service**
- **Compiling the Metalib categories from the MUL Databases Web Pages**
- **Setting up the MultiSearch Web Page**
- **Help Desk Guides**
- **Staff training programme at all campuses**
- **Communication strategy**

# Metalib Categories

- **Taken from the Databases Subject Pages**
- **Subject and Titles Databases Pages generated from bib records in Voyager catalogue, using 691 and 692 MARC fields**
- **Key Resources in Metasearch designated by subject librarians**

# Ongoing Tasks

- **Continue to implement SFX in vendor systems**
- **Integrate Multisearch maintenance into Digital Resources Team workflows**
- **Implement Metalib categories searches in Subject Guides web pages**
- **Explore further creative uses for Metalib and SFX to improve library services**
